Dear Hiring Manager,

I am writing to express my interest in the software developer backend position at Pleo. I have a passion for growth, technology, and am constantly trying out new technologies/softwares and looking and figuring out how they work. On top of that I am in fact a board game wizard, which to me was the most important requirement in your job posting. Currently I work in customer service at Paylocity, which I think gives me a good understanding of the user experience with softwares that handles expenses.

As a full-stack software engineer with experience in front-end development, back-end programming, and programming RESTful api's. I have a strong understanding of technologies such as Javascript, React, HTML, and CSS. I have also worked with frameworks such as Node.JS, Express, and PostgreSQL, and have experience with tools such as Mocha, Chai, and Knex.

In addition to my technical skills, I have experience working in customer support, providing troubleshooting and conceptualizing solutions for problems. This experience has taught me the importance of excellent communication skills and the ability to work collaboratively with others.

I am excited about the opportunity to join the team at Pleo and contribute in any way I can. Thank you for considering my application. I look forward to discussing this opportunity further.

Sincerely,
Alex Fischer
